

My name is Jane Doe. I have a master's degree in biochemistry from the University of Hometown. I am seeking a position in a lab where I can use my biochem. Experience while I decide whether or not to go to grad school. I have never been on a research cruise but I have spent a great deal of time in boats so I believe I would enjoy working at sea. Please find my CV below. You can contact me at jane.doe at mymailaddress.co.
